Additional Facility Information, T706A

T706A was an approximately 1440 square foot, corrugated metal-skinned trailer. The facility was constructed in 1979 as an office trailer. 5'x8' covered wooden decks and steps were attached to the facility, leading to the east and west doors of the trailer.

The only utility connected to this facility was electric service, provided by a drop-down line. This line was disconnected prior to commencement of building demolition activities.
